FRUIT TREES AND ORNAMENTALS

GREENSBORO, N.C.

FALL 1946 • SPRING 1947
Magnificent ROSES

ETOILE DE HOLLANDE  PINK RADIANCE

NANDINA DOMESTICA

CONIFEROUS EVERGREENS
104 Years Is A Long Time

THE LINDLEY NURSERIES

have been in business since 1842, and within a few miles of the original location. Now starting well into the second century.

EXPERIENCED

PROGRESSIVE

DEPENDABLE

Beginning in a small way in 1842, with a select list of fruit trees, it has grown until today there are more than five hundred acres in the nursery farm. Almost all types of trees and plants are now produced, as well as our doing extensive landscape work.

With our facilities and experience, we are in a position to handle your business along this line in a manner satisfactory to you, and shall be glad to hear from you. Write, telephone, call in person; we are here to serve you, and our representatives travel widely.

We now have, we believe, the most modern warehouse, storage cellar, and office of any nursery in the South, and we invite your inspection.

11-25-46
PRICES in this catalog cancel all previous lists and quotations, and are subject to change without notice.

"3 TO 4 FEET" means that the tree or plant will be 3 feet or over, but under 4 feet; and throughout the list the same.

STOCK SPECIALLY SELECTED by customers at the Nurseries will be charged according to the value of the stock chosen, irrespective of catalog price.

VISITORS WELCOME. You are invited not only to visit the office, but to go over the extensive grounds as well. There are more than 500 acres in the farm.

OUR LOCATION. Now on Friendly Road, via Guilford College school, 6 miles west of city limits, ½ mile east of highway 421 to Winston-Salem. Our shipping point is Guilford College, N. C.

PRICES INCLUDE PACKING, EXCEPT ON SPECIAL BULKY PIECES, for which cost of packing will be extra, and f.o.b. our shipping station, or for local delivery on our regular routes.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when for their convenience accounts will be opened, due in 30 days from date of invoice.

AUTO-TRUCK DELIVERIES, based on actual cost, if no Government regulations to interfere, are made within a reasonable distance of our Nurseries. The advantages of truck delivery are many. Boxing is eliminated, stock arrives in much better condition, and the goods are landed on the ground within a short time after being dug.

GUARANTEE: When stock has been properly cared for, and the account paid promptly as agreed, any plants that fail to grow the first season will be resupplied once at half list price at our warehouse; transportation and planting costs, if any, extra.

Lindley Nurseries, Inc., exercise the greatest care possible to keep their varieties true, and hold themselves in readiness to reship any tree or plant that may prove otherwise, or refund the original sum of money paid therefor, if reported to them within five years from date of order. It is mutually agreed that they are not further responsible in any case. However, we can give no warranty as to productiveness of fruit, flower or berry of plants we sell.

OFFICIAL INSPECTION. We furnish with each shipment a certificate that our Nurseries have been examined by the State Entomologist of North Carolina and found free from contagious diseases.
CONIFEROUS EVERGREENS

Some locations around the home grounds just seem to call for coniferous evergreens, in some form, either upright, medium or spreading growth, as they lend richness and dignity as no other class of plants can. The varieties offered here are tried and true and will give good results when planted in suitable locations. Most of the sorts require almost full sun, though a few will do very well in partial shade.

EACH

Biota bakeri. ................. BAKER ARBORVITAE
Foliage bluish green. New growth tinged with yellow. Upright, columnar.
2 to 2½ ft. ......................... 3.00
2½ to 3 ft. ......................... 3.50
3 to 3½ ft. ......................... 4.00

Biota compacta.
Medium dwarfish; compact rounded growth, about 2/3 wide as high.
2 to 2½ ft. ......................... 3.00
2½ to 3 ft. ......................... 4.00
3 to 3½ ft. ......................... 5.00

Biota excelsa.
Medium, compact, upright growth. Dark green foliage.
2 to 2½ ft ......................... 3.50
2½ to 3 ft. ......................... 4.00

Biota orientalis .......... ORIENTAL ARBORVITAE
Light green foliage. Tall growth; variable in form, though usually broadly pyramidal.
4 to 5 ft. ......................... 7.00
5 to 6 ft. ......................... 8.00
6 to 7 ft. ......................... 10.00

Chamaecyparis. See Retinospora.

Cryptomeria.
Limited quantity large sizes quoted on request.

Cunninghamia lanceolata .......... CHINESE FIR
Dark green, lance-like foliage. Tall growth; makes a spectacular tree. Shear for more compactness.
4 to 5 ft. ......................... 7.50
5 to 6 ft. ......................... 9.00
6 to 7 ft. ......................... 12.50
7 to 8 ft. ......................... 15.00
8 to 10 ft. ....................... 20.00

Juniperus chinensis pfitzeriana. PFITZER JUNIPER
Bluish green foliage. Broad, spreading, with almost horizontal to slightly erect branches.
2½ to 3 ft. spread .................. 5.50
3 to 4 ft. spread .................. 7.00
4 to 5 ft. spread .................. 10.00
5 to 6 ft. spread .................. 15.00
6 to 7 ft. spread .................. 20.00
7 to 8 ft. spread .................. 25.00
Juniperus chinensis ...SARGENT JUNIPER
Spreading, low growth; green foliage. Does not get near as tall as Pfitzer. Suitable as a ground cover.
18 to 24 ins. spread 3.75

Juniperus chinensis sargentii, BLUE.
Spreading, low growth, with distinct blueish cast. More compact than the preceding.
18 to 24 ins. spread 3.75
2 to 2½ ft. spread 4.50

Juniperus communis ...ENGLISH JUNIPER
Bluish green prickly foliage. Semi-narrow medium to tall growth.
2 to 3 ft. 3.50
3 to 4 ft. 4.25
4 to 5 ft. 6.25
5 to 6 ft. 8.00
6 to 7 ft. 10.00
7 to 8 ft. 12.50
8 to 10 ft. 15.00

Juniperus com. ashfordi ...ASHFORD JUNIPER
Foliage very similar to Irish Juniper. Narrow columnar, formal growth.
2 to 2½ ft. 3.50
2½ to 3 ft. 4.00
3 to 3½ ft. 5.00

Juniperus communis hibernica ...IRISH JUNIPER
Compact, upright, narrow columnar medium growth. One of our oldest and best known varieties; still popular.
2 to 2½ ft. 3.50
2½ to 3 ft. 4.00
3 to 3½ ft. 5.00
3½ to 4 ft. 6.00
4 to 5 ft. 7.50
5 to 6 ft. 10.00

Juniperus communis hibernica fas-tig-ia-tus.
A little more compact and symmetrical than Irish Juniper, slightly darker foliage.
3 to 3½ ft. 6.00
4 to 4½ ft. 7.50

Juniperus communis suecica ...SWEDISH JUNIPER
Narrow, upright compact, medium growth; light green foliage.
18 to 24 ins. 3.00

Juniperus excelsa stricta ...SPINY GREEK JUNIPER
Grayish-green foliage; broadly cone-shaped; low to medium growth.
2 to 2½ ft. 3.75

Juniperus horizontalis.
Spreading, slightly erect—just enough to hold limbs off the ground. Grayish green.
18 to 24 ins. spread 3.00
Juniperus sabina .......................SAVIN JUNIPER
Semi-spreading, dwarfish; dark green foliage.
18 to 24 ins. spread .......................... 2.50
2 to 3 ft. spread ................................ 3.00

J. sabina tamariscifolia TAMARIX SAVIN JUNIPER
Spreading, low growth; fine foliage.
18 to 24 ins. spread .......................... 2.50
2 to 3 ft. spread ................................ 3.00

Juniperus virginiana .............. NATIVE CEDAR
4 to 5 ft. ...................................... 6.25
5 to 6 ft. ...................................... 8.00
Limited quantity larger sizes quoted on request.

Limited quantity large sizes quoted on request.

Pinus mughus .........................MUGHO PINE
Very low, dwarf growth; bright green foliage.
18 to 24 ins. spread .......................... 4.00
2 to 3 ft spread ................................ 6.00

Pinus strobus .........................WHITE PINE
Long flexible needles; whitish beneath. Tall growth.
5 to 6 ft. ...................................... 7.50
6 to 8 ft. ...................................... 10.00

Retinospora obtusa nana.
Very dwarfish, compact, irregular, unusual, fan-shaped; dark green foliage.
18 to 24 ins. .................................. 3.50
2 to 2½ ft. .................................... 5.90

Retinospora pisifera .............SAWARA RETINOSPORA
Rich bluish green foliage, branchlets flattened and slightly drooping. Somewhat pyramidal, medium vigorous growth, which stands shearing well.
5 to 6 ft. ...................................... 8.00
6 to 7 ft. ...................................... 10.00

Retinospora pisifera aurea.GOLDEN SAWARA RET.
Similar to above except foliage tipped with bright yellow in the spring. Medium growth, not as vigorous as preceding.
3 to 4 ft. ...................................... 5.00
4 to 5 ft. ...................................... 6.25
5 to 6 ft. ...................................... 8.00

Retinospora plumosa ... PLUMED RETINOSPORA
Dense conical habit; dark green foliage of fine texture. Medium grower, easily pruned.
2 to 2½ ft. .................................... 3.00
2½ to 3 ft. .................................... 3.50
3 to 4 ft. ...................................... 5.00
4 to 5 ft. ...................................... 6.25
5 to 6 ft. ...................................... 8.00
6 to 7 ft. ...................................... 10.00

Retinospora plumosa aurea. GOLDEN PLUME RET.
Very similar to above except the new growth is golden yellow; more compact grower.
2 to 2½ ft. .................................... 3.00
4 to 5 ft. ...................................... 6.25
5 to 6 ft. ...................................... 8.00
Retinospora plumosa viridissima.
Fine feathery green foliage. Dwarfish, compact; low to medium tall, but rather broad growth.

Thuja occidentalis hoveyi HOVEY ARBORVITAE
Bright green foliage in spring. Broad, roundish.
18 to 24 ins. ........................................ 2.50
3 to 3½ ft. .......................................... 6.00
3½ to 4 ft. .......................................... 7.50

Thuja occidentalis nigra DARK AM. ARB.
This is a new strain of the well known American Arborvitae with very dark green foliage, even in the spring; more compact, only medium tall, broadly pyramidal.
18 to 24 ins. ........................................ 3.00
2 to 2½ ft. .......................................... 4.00
2½ to 3 ft. .......................................... 5.00

Thuja oc. pyramidalis PYRAMIDAL ARBORVITAE
Usually more columnar than pyramidal. Medium vigorous growth. Bright green foliage.
2 to 2½ ft. .......................................... 3.50
2½ to 3 ft. .......................................... 4.00
3 to 4 ft. .......................................... 5.50
4 to 5 ft. .......................................... 7.50
5 to 6 ft. .......................................... 8.50

Thuja occidentalis veraneana
The foliage is light green, and smaller, more dense than the regular American Arborvitae, to which family it belongs.
18 to 24 ins. ........................................ 2.50

Thuja occidentalis wareana SIBERIAN ARB.
Light green foliage. Compact, broad.

18 to 24 ins. ........................................ 3.00
2 to 2½ ft. .......................................... 3.50

Thuja plicata. (lobbl) GIANT ARBORVITAE
This is the tree from which the Indians carved their totem poles. Tall growth, broad base.
2 to 3 ft. .......................................... 3.50
3 to 4 ft. .......................................... 4.25

Tsuga canadensis CANADIAN HEMLOCK
Tall growth, spreading horizontal branches; dark green needles.
18 to 24 ins. ........................................ 3.00
2 to 2½ ft. .......................................... 3.50
2½ to 3 ft. .......................................... 4.25

LOCATION: On highway No. 421 toward Winston-Salem, just east of the airport.
BROAD-LEAF EVERGREENS

This class of plant material is suited to the Piedmont section better than almost anything else, as you can have plants that are evergreen, and many of them bloom and berry, while some lend themselves to formal pruning. We are very fortunate in being privileged to live with such plants around us. They almost all stand shearing well.

Dug with ball of earth unless otherwise specified. N. R. means that it will be handled naked rooted.

EACH

Abelia Edward Goucher (Gosha).
Light pink flowers in abundance; drooping branches, more dwarfish than the following.
18 to 24 ins. spread .......................... 2.00

Abelia grandiflora ..............GLOSSY ABELIA
Pinkish white bell-shaped flowers from June till frost. Medium growth.
18 to 24 ins. ................................ N.R. 1.00
2 to 3 ft. .................................. N.R. 1.25
2 to 3 ft. .................................. B.&B. 1.75
3 to 4 ft. .................................. B.&B. 2.25
4 to 5 ft. .................................. B.&B. 3.25

Azalea hinoegiri. .....................KURUME
Bright ruby red or brilliant carmine, single flowers in mid season. Rounded foliage.
6 to 8 ins. spread ......................... 3.00
8 to 10 ins. spread ....................... 4.00
10 to 12 ins. spread ...................... 5.00
12 to 15 ins. spread ...................... 6.50

Bambusa .......................... BAMBOO
Tall tropical looking evergreen grass.
Clumps, 6 to 8 ft. .......................... 5.00

Berberis atrocarpa (Louvis)
Rather dense, prickly, light green foliage; medium grower.
2 to 2½ ft. ................................ 3.50
2½ to 3 ft. ................................ 4.00
3 to 3½ ft. ................................ 5.00

Berberis julianae ....WINTERGREEN BARBERRY
Deep green leaves, turning scarlet; yellow flowers, in early spring; purplish berries; prickly, vigorous.
18 to 24 ins. .......................... 3.25
2 to 2½ ft. ................................ 4.00
2½ to 3 ft. ................................ 5.00
3 to 4 ft. ................................ 6.50

Berberis sargentiana.
Prickly, spiny-toothed foliage, light grayish green. Berries blue to black.
18 to 24 ins. .......................... 3.00
2 to 2½ ft. ................................ 3.50
2½ to 3 ft. ................................ 4.00
Berberis verruculosa. 
Compact, dwarfish; small shiny leaves; yellow flowers. 
12 to 18 ins. spread ........................................ 3.00
18 to 24 ins. spread ........................................ 4.00

Buxus japonica .................. JAPANESE BOXWOOD
Dark green small leaves; growth slightly more 
spread than height. 
10 to 12 ins. .................................................. 2.00
12 to 15 ins. .................................................. 2.50

Buxus sempervirens ................ COMMON BOXWOOD
6 to 8 ins. .................................................... .75
8 to 10 ins. ................................................... 1.00
Larger sizes from two to six feet quoted on request.

Buxus suffruticosa OLD ENGLISH DWARF BOXWOOD
Very slow growing. Aristocratic.
21 x 14 ins. .................................................. 9.00
24 x 16 ins. .................................................. 11.00
27 x 18 ins. .................................................. 14.00
Limited quantity larger sizes quoted on request.

Cotoneaster conspicua decora.
Low, spreading; very small leaves. Reddish yellow 
berries.
2 to 3 ft. spread ............................................. 3.25
3 to 4 ft. spread ............................................. 4.00

Cotoneaster franchetti.
Grayish green foliage; growth upright and spreading; red berries.
2 to 3 ft. ....................................................... 4.00
3 to 4 ft. ....................................................... 5.00

Cotoneaster horizontalis.
Leaves shiny green, scarlet berries. Branches almost 
horizontal. Semi-evergreen.
18 to 24 in. spread ........................................... 2.50
2 to 3 ft. spread ............................................. 3.25

Cotone. microphylla .. ROCKSPRAY COTONEASTER
Very small (tiny) dark green shiny leaves, dark red 
berries, long stem; spreading habit.
18 to 24 ins. spread ........................................... 2.50
2 to 3 ft. spread ............................................. 3.25
3 to 4 ft. spread ............................................. 4.00

Cytisus scoparius .............. SCOTCH BROOM
Green branches, very small leaves; yellow flowers 
about 1 in. long in late spring; very striking.
2 to 3 ft. ....................................................... 2.50
3 to 4 ft. ....................................................... 3.50
4 to 5 ft. ....................................................... 5.00
5 to 6 ft. ....................................................... 6.50
Elaeagnus fruitlandii.
Medium size green leaves slightly gray above with silver underside; pinkish white berries in the spring; fragrant flowers in fall.

Ilex cassine ............................... DAHOON HOLLY
Small bright red berries. Leaves small, narrow, smooth edges. Upright grower.
2 to 3 ft. .................................................. 4.00
3 to 4 ft. .................................................. 5.50
4 to 5 ft. .................................................. 9.00
5 to 6 ft. ................................................. 12.00
6 to 7 ft. ................................................. 15.00

Ilex cornuta ............................................ CHINESE HOLLY
Very dark shiny foliage, very spiny. Large red berries. Compact, pyramidal growth.
18 to 24 ins. ............................................. 5.00
2 to 2½ ft. ............................................... 6.50
2½ to 3 ft. .............................................. 7.50

Ilex cornuta burfordi
Similar to above except the leaves are practically without spines, and growth more vigorous.
18 to 24 ins. ............................................. 5.00

Ilex crenata .......................................... JAPANESE HOLLY
Small leaves, somewhat resembling boxwood, medium growth. Black berries.
2 to 2½ ft. .............................................. 4.00
2½ to 3 ft. .............................................. 5.00
3 to 3½ ft. .............................................. 7.00
3½ to 4 ft. ............................................. 8.50
4 to 5 ft. ................................................. 10.00

Ilex crenata convexa (Bullata).
An addition to our already varied assortment of this valuable family of plants, with small, convex leaves; rather dwarfish spreading habit.
12 to 15 ins. spread .................................... 3.50
15 to 18 ins. spread .................................... 4.00
21 to 24 ins. spread .................................... 6.50

Ilex crenata lindleyana.
Our own introduction, of which we are very proud. The foliage is practically the same as the regular type, but the plant is broader.
18 to 24 ins. ............................................. 4.00
2 to 2½ ft. ............................................... 5.00
2½ to 3 ft. .............................................. 6.25
3 to 3½ ft. .............................................. 7.50

Ilex crenata macrophylla ................................BIGLEAP JAP. HOLLY
Black berries; more spreading, medium growth; larger and broader leaves.
2 to 2½ ft. .............................................. 3.25
2½ to 3 ft. .............................................. 4.50
3 to 3½ ft. .............................................. 6.00
3½ to 4 ft. .............................................. 7.50

Ilex crenata microphylla ........................... LITTLELEAF JAP. HOLLY
Very small leaves, narrow growth. Blue-black berries.
2½ to 3 ft. .............................................. 5.00
3 to 3½ ft. .............................................. 6.50
3½ to 4 ft. .............................................. 7.50
4 to 5 ft. ............................................... 10.00
5 to 6 ft. ................................................. 12.50
**Ilex crenata rotundifolia (globosa)**
Dwarfish, spreading, compact; dark green foliage.
15 to 18 ins. spread ........................................ 4.00
18 to 24 ins. spread ........................................ 5.00

**Ilex humei ........................................... HUME HOLLY**
2 to 3 ft. .................................................. 4.50
3 to 4 ft. .................................................. 6.50
4 to 5 ft. ................................................ 12.00

**Ilex opaca ........................................ AMERICAN HOLLY**
Native evergreen tree. Prickly foliage, usually with red berries. Add 50% if you want to be certain of a berry bearing tree.
3 to 4 ft. .................................................. 7.50
4 to 5 ft. ................................................ 10.00
5 to 6 ft. ............................................. 12.50
6 to 7 ft. ............................................. 15.00

**Ilex opaca howardi.**
Very similar to ordinary American Holly, except that it berries much better, as it is grafted.
3 to 4 ft. .................................................. 8.50
4 to 5 ft. ................................................ 11.00

**Ilex vomitoria ....................................... YAUPON**
2 to 3 ft. .................................................. 4.50
3 to 4 ft. ................................................ 6.50
4 to 5 ft. ............................................. 8.00
5 to 6 ft. ............................................. 10.00
6 to 7 ft. ............................................. 12.50

**Illicium anisatum .......................... JAPANESE ILLICICUM**
Long, broad, light green leaves; bushy; hardy.
2 to 3 ft. .................................................. 4.00

**Jasminum floridum ........EVERBLOOMING JASMINE**
Bright green foliage. Golden yellow flowers all summer. Low spreading growth. Leaves alternate. Semi-evergreen. Usually a heavy crop of bloom very similar to Jasminum nudiflorum in the late spring. The plant should be heavily pruned after this; then the new growth will produce a good crop of flowers till frost.
18 to 24 ins. spread ..................................... 2.50
2 to 3 ft. spread ........................................ 3.00
3 to 4 ft. spread ........................................ 4.00
4 to 5 ft. spread ........................................ 6.00

**Laurocerasus caroliniana**
Shiny green leaves, about 3x1 inches; easily pruned. Tall, upright.
2 to 3 ft. .................................................. 5.00
3 to 4 ft. ................................................ 6.00
4 to 5 ft. ............................................. 7.50
5 to 6 ft. ............................................. 9.00

**Laurocerasus officinalis ............ ENGLISH LAUREL**
Long broad shining foliage. Heavy growth.
2 to 2½ ft. .............................................. 4.00
2½ to 3 ft. ............................................ 5.00
3 to 4 ft. ............................................. 7.00
4 to 5 ft. ............................................. 9.00
Laurocerasus officinalis rotundifolia.

The color of the foliage is a lighter green than the preceding, and is roundish; slightly more compact in growth.

Ligustrum
THE PRIVETS

To avoid confusion in this varied family of plants, we have rewritten the descriptions, giving habit of growth as well as information on the foliage. The following sorts have a wide range in growth and in the leaves, and will serve many useful purposes in foundation plantings and in hedges.

Ligustrum amurense
AMUR PRIVET

An evergreen hedge plant, universally used in the South. Easily pruned to desired shape.

**Ligustrum quihoui pendula.**
A low, spreading sport from the above.
- 2 to 3 ft. spread ........................................... 2.50
- 3 to 4 ft. spread ........................................... 3.50

**Ligustrum sinense nana. DWARF COMPACT PRIVET**
Foliage small, slightly crinkled around edge. Medium growth.
Limited quantity various sizes quoted on request.

**Ligustrum sinense pendula WEEPING PRIVET**
Semi-evergreen. Low pendulous growth.
Limited quantities various sizes quoted on request.

**Lonicera heckrotti EVERBLOOMING HONEYSKLE**
Pinkish lilac flowers; quite fragrant blooms, most of summer. A heavy growing vine.
- 3-year .......................................................... 3.00

**Magnolia grandiflora SOUTHERN MAGNOLIA**
Large, shiny leathery leaves. Fragrant white flowers. Makes a medium to large tree finally.
- 3 to 4 ft. ...................................................... 5.50
- 4 to 5 ft. ...................................................... 7.00
- 5 to 6 ft. ...................................................... 9.00
- 6 to 7 ft. ...................................................... 12.00
- 7 to 8 ft. ...................................................... 15.00

**Myrica cerifera WAX MYRTLE**
Also called Bayberry and Tallow Shrub. Lance shaped leaves, resistant to salt spray, the bush compact and about as broad as high; berries aromatic, waxy. Early pioneers melted the wax and made tallow candles, hence the name Tallow Shrub.
- 3 to 4 ft. .......................................................... 6.00

**Nandina domestica HEAVENLY BAMBOO**
Foliage and berries turn red in fall, the berries in large clusters. Creamy white flowers spring. Dwarfish to medium growth.
- 18 to 24 ins ..................................................... 2.50
- 2 to 2½ ft. ..................................................... 3.25
- 2½ to 3 ft. ..................................................... 4.00

**Osmanthus aquifolia HOLLY OSMANTHUS**
Glossy dark green holly-like leaves; small fragrant white flowers spring, blue berries.
- 18 to 24 ins ..................................................... 3.00
- 2 to 2½ ft. ..................................................... 4.00
- 2½ to 3 ft. ..................................................... 5.50
- 3 to 4 ft. ..................................................... 7.00

**Osmanthus fortunei.**
Foliage somewhat resembles Holly. Fragrant white flowers in October. Upright grower.
- 18 to 24 ins ..................................................... 3.00
- 2 to 2½ ft. ..................................................... 4.50
- 2½ to 3 ft. ..................................................... 5.50
- 3 to 4 ft. ..................................................... 7.00

**Pachysandra terminalis JAPANESE SPURGE**
Evergreen ground cover. Dark green foliage. Requires partial shade.
- 2½ in. pots (100, $20) ........................................ 35
Photinia serrulata ..................CHINESE PHOTINIA
Large lustrous leathery leaves with serrated edges; vigorous. Red berries in July.
18 to 24 ins. ..................................... 3.50
2 to 3 ft. ........................................ 4.50

Pyracantha coccinea.
Low, spreading, compact growth; small leaves, thorny; orange red berries fall.
18 to 24 ins. spread .............................. 3.50
2 to 3 ft. spread ................................ 5.00
3 to 4 ft. spread ................................ 7.00

Pyracantha crenulata.
Leaves wavy-toothed, glabrous, shiny above. Red berries. Medium tall, compact growth.
5 to 6 ft. ....................................... 6.00

Pyracantha graebneri.
Smaller leaves than yunnanensis, larger and redder berries. Strong semi-spreading growth.
2 to 3 ft. spread ................................ 4.00
3 to 4 ft. spread ................................ 5.00
4 to 5 ft. spread ................................ 7.50

Py racantha lalandi .......... LALAND FIRETHORN
White flowers spring, orange berries fall on 2nd year wood. Tall open growth.
2 to 3 ft. ........................................ 3.50
3 to 4 ft. ........................................ 4.50
4 to 5 ft. ........................................ 6.00
5 to 6 ft. ....................................... 7.50

Py racantha yunnanensis (Crenato-serrata).
Grows spreading naturally, but can be trained upright with a little care. Small to medium leaves; bright red berries till after Christmas.
18 ins. to 24 ins. spread ........................ 4.00
2 to 3 ft. spread ................................ 5.00
3 to 4 ft. spread ................................ 7.50

Viburnum rhytidophyllum ....LEATHERLEAF VIB.
Large, heavy leather-like leaves. White flowers spring; red berries summer. Does well in shade. Medium to tall growth.
18 to 24 ins. ..................................... 2.50
2 to 2½ ft. ...................................... 3.00

Yucca filamentosa ............... ADAMS NEEDLE
Pure white flowers on stout stems about four feet high, centered in the foliage. June.
18 to 24 ins. spread ................................ 2.50
2 to 2½ ft. spread ................................ 3.25
TREES
Shade, Street, Ornamental

This list of trees has been gotten together after much effort and study, and we know you will find the descriptions interesting. We call your special attention to the comprehensive list of Flowering Crabs (Malus), in various sizes and varied descriptions.

Usually dug and handled without balling; where balling is desired, add 50% to these prices.

EACH

**Acer dasycarpum** ..........SILVER MAPLE
Rapid growing. Silver gray foliage. (We recommend digging B.&B.)

Cornus florida rubra RED-FLOWERING DOGWOOD
Large single flowers, pink to red.
2 to 3 ft. .............................................. 6.00

Fraxinus americana ..................WHITE ASH
One of the better quick-growing tall trees, with large leaves.
6 to 7 ft. ........................................... 2.50
7 to 8 ft. ......................................... 3.25
8 to 10 ft. ....................................... 4.50

Gleditsia triacanthos .................HONEY LOCUST
Tall grower, rather open top; long edible pods.
4 to 5 ft. ......................................... 2.00
5 to 6 ft. ......................................... 3.00

Ilex opaca ...................... AMERICAN HOLLY
Our native evergreen holly. Prickly foliage, usually with red berries. Add 50% if you want to be certain of a berry bearing tree.
3 to 4 ft. ........................................... B.&B. 7.50
4 to 5 ft. ........................................... B.&B. 10.00
5 to 6 ft. ........................................... B.&B. 12.50
6 to 7 ft. ........................................... B.&B. 15.00

Ilex opaca Howardii.
Very similar to ordinary American Holly, except that it berries much better, as it is grafted.
3 to 4 ft. ........................................... B.&B. 8.50
4 to 5 ft. ........................................... B.&B. 11.00

Juglans nigra ..........COMMON BLACK WALNUT
Makes nice, lacy, attractive shadows on the lawn. Large edible nuts.
3 to 4 ft. ........................................... 3.00
4 to 5 ft. ........................................... 3.50
5 to 6 ft. ........................................... 4.25
6 to 7 ft. ........................................... 5.00
7 to 8 ft. ........................................... 6.00

Koelreuteria paniculata ............GOLDENRAIN-TREE
Compound leaves; yellow flowers in the summer in large clusters. Medium grower.
4 to 5 ft. ........................................... 2.50
5 to 6 ft. ........................................... 3.50

Magnolia grandiflora ..........SOUTHERN MAGNOLIA
Large shiny, evergreen, leathery leaves. Large fragrant white flowers. Large growth.
3 to 4 ft. ........................................... 5.50
4 to 5 ft. ........................................... 7.00
5 to 6 ft. ........................................... 9.00
6 to 7 ft. ........................................... 12.00
7 to 8 ft. ........................................... 15.00

Malus ..................FLOWERING CRAB APPLE
We are rather proud of our selection of this item, there being a wide range of varieties and shapes. They are among the best 45 in the whole country, as recently reported by the highest horticultural authority in the land. (We recommend that all Malus be dug B.&B., at the 50% increase in price.)
**Malus atrosanguinea** ....... **CARMINE CRAB APPLE**
Foliage and stems reddish purple. Carmine buds, changing to pink; mid-season.

LANDSCAPE DEPARTMENT: We are prepared to render you every help needed to make your place outstanding in appearance. Our landscape architects are men of training and experience, and know Southern plant material and what to do with it to get the best artistic results for you in improvement of your place. Not only do we offer plans and plants, but actually set the plants on your lawn within a reasonable distance. All at lowest cost possible for the class of work done.
FLOWERING SHRUBS

There is a multitude of ways that flowering shrubs may be used to advantage, as individual specimens, group plantings, hedges, etc. Shrubbery borders are now much more in vogue than formal clipped hedges; they can be so arranged as to give almost continuous bloom or berry the year 'round, thus adding interest to your home grounds. The descriptions are as plain and accurate as we know how to make them, but if you need advice, write us and our Landscape Department will help you decide what best to use.

These plants are dug and handled without balling; if balling is desired, double the price.

**EACH**

**Acer palmatum** ............... JAPANESE MAPLE
A small irregular, bushy, graceful tree with green foliage.

2 to 3 ft. .................................. 2.00
3 to 4 ft. .................................. 3.00
4 to 5 ft. .................................. 4.00
5 to 6 ft. .................................. 5.00

**Amorpha fruticosa** ............... FALSE INDIGOBUSH
A bushy, formless, tall shrub up to 10 feet. Dark purple flowers, varying to pale blue in candle-like spikes to six inches long, in early summer.

2 to 3 ft. .................................. 1.00
3 to 4 ft. .................................. 1.50
4 to 5 ft. .................................. 2.00
5 to 6 ft. .................................. 2.50

**Aronia arbutifolia** ............... RED CHOKEBERRY
Small showy white flowers spring. Red berries fall. Orange-red foliage fall. Tall slender growth.

3 to 4 ft. .................................. 1.50
4 to 5 ft. .................................. 2.00
5 to 6 ft. .................................. 2.50
6 to 8 ft. .................................. 3.25

**Berberis thunbergii** ............. JAPANESE BARBERRY
Small yellow flowers, fruit red or coral; brilliant autumn coloration. Branches prickly, low growth.

18 to 24 ins. ................................ 1.00
2 to 3 ft. .................................. 1.25

**Berberis atropurpurea** .......... PURPLE-LEAF BARBERRY
Medium, somewhat spreading growth.

18 to 24 ins. ................................ 2.00

**Buddleia davidii** ................. BUTTERFLY BUSH
Also called SUMMER LILAC on account of its resemblance to that shrub in so far as the bloom is concerned. It is a strong grower; has grayish green foliage.

2 to 3 ft. .................................. 1.00

**Callicarpa purpurea** .......... PURPLE BEAUTYBERRY
Violet-lilac berries in early fall. Pendulous medium growth when loaded with berries.

18 to 24 ins. ................................ 1.00
2 to 3 ft. .................................. 1.50
**Calycanthus floridus** ..........SWEET SHRUB
Reddish brown flowers spring and early summer. Usually fragrant, but not guaranteed. Low growth.
18 to 24 ins. .................. 1.00
2 to 3 ft. .................. 1.50
3 to 4 ft. .................. 2.00

**Caryopteris Incana (mastacanthus) ....BLUE SPIREA**
Leaves 2 to 3 inches long, grayish. Flowers violet or lavender-blue, in fall. Low dainty growth.
2 to 3 ft. .................. 2.00

**Celastrus scandens ....AMERICAN BITTERSWEET**
A rather heavy, shrubby vine; orange yellow berries with crimson appendage (aril) that retain their color when cut and dried.
2 to 3 ft. .................. 1.00
3 to 4 ft. .................. 1.50

**Cercis canadensis .... JUDAS TREE or RED BUD**
Rosy-pink pea-like flowers in clusters. Leaves heart-shaped. Tall broad, bushy growth.
3 to 4 ft. .................. 2.00
4 to 5 ft. .................. 3.00
5 to 6 ft. .................. 4.00
6 to 7 ft. .................. 5.00
7 to 8 ft. .................. 6.50
8 to 10 ft. ............... 8.00

**Cercis chinensis .......... CHINESE REDBUD**
Dwarfish growing; free flowering, similar to common Redbud.
2 to 3 ft. ............... 1.50

**Chionanthus virginica ....WHITE FRINGETREE**
Large, tall growth, large leaves; white fringe-like flowers early summer. Will make a small tree if pruned to that shape; ours are bushy.
2 to 3 ft. ............... 1.50

**Clethra alnifolia .......... SWEET PEPPERBUSH**
Low to medium growth. White very sweet flowers in summer.
18 to 24 ins. ............. 1.00

**Cornus stolonifera ....... REDOSIER DOGWOOD**
Flat-topped clusters of white flowers in spring; clusters of white to blueish berries in mid-summer; red twigs all winter when kept thrifty.
2 to 3 ft. ............... 1.00
3 to 4 ft. ............... 1.50
4 to 5 ft. ............... 2.00

**Cotoneaster divaricata.**
Leaves dark green, shiny, about 3/4 in. long; pinkish flowers, followed by bright red berries.
3 to 4 ft. ............... 2.00
4 to 5 ft. ............... 2.50

**Cydonia japonica .......... FLOWERING QUINCE**
Orange, red and pink flowers mixed, early spring before the leaves appear. The fruit is good for jelly. Medium to low growth.
18 to 24 ins. ............. 1.25
2 to 3 ft. ............... 1.50
3 to 4 ft. ............... 2.50
Cydonia japonica alba ........ WHITE FL. QUINCE
Growth same as preceding, but with white flowers.
18 to 24 ins. ........................................ 2.00
2 to 3 ft. ........................................ 2.50

Cydonia japonica rubra ........ RED FL. QUINCE
Same as preceding except flowers red.
18 to 24 ins. ........................................ 2.00
2 to 3 ft. ........................................ 2.50
3 to 4 ft. ........................................ 3.50

Desmodium penduliflorum . LESPEDEZA FORMOSA
Conspicuous small rosy flowers in clusters in summer. Medium pendulous growth.
Clumps ........................................ 1.50

Deutzia.
An important group of flowering shrubs. The stems are usually hollow, and mostly shreddy bark. Flowers in terminal clusters, produced in late spring or early summer when most spring-flowering plants are through. Upright growth.

Deutzia candida ............SNOWFLAKE DEUTZIA
Double white flowers spring. Medium growth.
2 to 3 ft. ........................................ 1.00
3 to 4 ft. ........................................ 1.50
4 to 5 ft. ........................................ 2.00

Deutzia gracilis .............SLENDER DEUTZIA
Low slender, graceful growth; small white delicate flowers in the late spring
12 to 15 ins. ........................................ 1.00
15 to 18 ins. ........................................ 1.25

Deutzia scabra (crenata) ....FUZZY DEUTZIA
Single white flowers in spring. Medium upright growth.
2 to 3 ft. ........................................ 1.00
3 to 4 ft. ........................................ 1.50
4 to 5 ft. ........................................ 2.00

Deutzia, Pride Rochester LARGE FLOWERING DTZ.
Flowers tinged with pink, late spring. Medium, upright growth. One of the best.
2 to 3 ft. ........................................ 1.00
3 to 4 ft. ........................................ 1.50
4 to 5 ft. ........................................ 2.00

Deutzia rosea.
Double light pink flowers in the late spring. Medium, upright growth.
2 to 3 ft. ........................................ 1.00
3 to 4 ft. ........................................ 1.50
4 to 5 ft. ........................................ 2.00

Erianthus ....................PLUME GRASS
A tall growing perennial grass with large plumes in the fall.
Clumps ........................................ 2.50
Exochorda racemosus (grandiflora) .. PEARLBUSH
White flowers in long clusters in early spring; globular pearl-like buds. Tall growth.
2 to 3 ft. ..................................... 1.00
3 to 4 ft. ..................................... 1.50

Forsythia .................................. GOLDENBELL
A most popular family of shrubs that produce an abundance of golden yellow flowers in clusters in early spring. Very effective when planted in masses.

Forsythia intermedia ...... BORDER GOLDENBELL
Yellow flowers in the early spring before the foliage appears. Medium growth.
2 to 3 ft. ..................................... 1.00
3 to 4 ft. ..................................... 1.50
4 to 5 ft. ..................................... 2.00

Forsythia spectabilis SHOWY BORDER GOLDENBELL
Most profuse of all, large golden showy flowers in the early spring. Strong grower.
2 to 3 ft. ..................................... 1.00
3 to 4 ft. ..................................... 1.50
4 to 5 ft. ..................................... 2.00

Forsythia suspensa ...... WEEPING GOLDENBELL
Pendant branches; excellent for banks and trellises; flowers yellow in early spring. Medium growth.
2 to 3 ft. ..................................... 1.00
3 to 4 ft. ..................................... 1.50

Forsythia viridissima .. GREENSTEM GOLDENBELL
Thick dark green leaves, green bark; latest to flower.
2 to 3 ft. ..................................... 1.00
3 to 4 ft. ..................................... 1.50

Hibiscus syriacus ......................... ALTHEA
These all bloom in the late fall, at a time when most shrubs have finished. They make tall, broad plants when out in the open. Can be trimmed to tree shape.

Hibiscus, Ardens ......................... DOUBLE VIOLET
Hibiscus, Jeanne d'Arc .................. DOUBLE, WHITE
Hibiscus, Paeoniflorus ................. DOUBLE, PINK
Hibiscus rubra .................. LARGE SINGLE, RED
2 to 3 ft. ..................................... 1.00

Hydrangea arborescens grandiflora SNOWHILL HYD.
Flowers large, double white in panicles most of summer. Does well in shade. Low growth.
18 to 24 ins. ................................ 1.50

Hydrangea paniculata grandiflora P G HYDRANGEA
Flowers late summer, white, very showy, gradually turning to pinkish bronze. Medium growth.
2 to 3 ft. ..................................... 1.50
Hypericum moserianum.  
A low growing plant, small leaves; large attractive yellow flowers.  
18 to 24 ins. .............................. 1.50

Ilex verticillata ..........COMMON WINTERBERRY  
Bright red berries lasting till mid-winter.  
18 to 24 ins. ............................. 1.25  
2 to 3 ft. ............................. 1.75

Jasminum nudiflorum ........WINTER JASMINE  
Flowers bright yellow early spring. Low, pendulous growth, green stems year round. Leaves small.  
18 to 24 ins. spread .................... 1.25  
2 to 3 ft. spread .................... 1.50  
3 to 4 ft. spread .................... 2.00

Kolkwitzia amabilis ............ BEAUTYBUSH  
As the name indicates, it is really a beautiful bush in the late summer, covered with small light pink flowers.  
18 to 24 ins. ............................. 1.50  
2 to 3 ft. ............................. 2.00

Lagerstromia indica ............ PINK CRAPE MYRTLE  
Used mainly as large shrub, but can be trained into trees about 20 feet tall. Flowers with crape-like petals in summer, usually from July till frost.  
2 to 3 ft. ............................. 2.00  
3 to 4 ft. ............................. 2.50  
4 to 5 ft. ............................. 3.00

Lag. indica rubra ............ RED CRAPE MYRTLE  
Same as above except red flowers.  
2 to 3 ft. ............................. 2.00  
3 to 4 ft. ............................. 2.50

Ligustrum ibota regelianum.......REGEL PRIVET  
Medium, spreading growth. White flowers summer, blue-black berries.  
3 to 4 ft. ............................. 1.50

Lonicera (Lon-iss'-er-ra) ....... BUSH HONEYSUCKLE  
Certainly one of our “first families” of flowering and berrying shrubs. Earliest to put on new foliage, telling us that spring is nearly here. They make wonderful screens with their thick foliage in summer and many branches in winter. The varieties morrowi, ruprechtiana, tatarica and podocarpa are great producers of berries that the birds feast on.  

Lonicera fragrantissima ....WINTER HONEYSUCKLE  
Fragrant white flowers in the very early spring. Medium growth. Does well in shade.  
2 to 3 ft. ............................. 1.00  
3 to 4 ft. ............................. 1.50

Lonicera lindleyana ........LINDLEY HONEYSUCKLE  
Similar in bloom to L. heckrottii, but upright in growth mainly. Flowers fragrant, in two-inch whorls; yellow, pinkish lilac.  
3 to 4 ft. ............................. 1.50
Lonicera morrowi ....... MORROW HONEYSUCKLE
White flowers spring, blood red berries summer.
2 to 3 ft. .................................. 1.00
3 to 4 ft. .................................. 1.50

Lonicera ruprechtiana MANCHURIAN HONEYSKLE
White flowers in spring, red berries summer. Semi-
spreading.
2 to 3 ft. spread .................................. 1.00
3 to 4 ft. spread .................................. 1.50
4 to 5 ft. spread .................................. 2.00

Lonicera tatarica .... TARTARIAN HONEYSUCKLE
Pink flowers in the spring; red berries in late sum-
mer. Medium growth.
3 to 4 ft. .................................. 1.50
4 to 5 ft. .................................. 2.00

Lonicera tatarica lutea (podocarpa).
White flowers spring, yellow berries summer.
2 to 3 ft. .................................. 1.00
3 to 4 ft. .................................. 1.50

Philadelphus MOCKORANGE
An old family, named for King Ptolemy Philadel-
phus of the 3d century B.C. The showy white flow-
ers make a grand display in the shrubbery border in
the late spring.

Philadelphus coronarius COMMON MOCKORANGE
Creamy white flowers in spring. Red stems.
2 to 3 ft. .................................. 1.00
3 to 4 ft. .................................. 1.50

Philadelphus falconeri .. FALCONER MOCKORANGE
Star-shaped white flowers. Rather upright growth.
3 to 4 ft. .................................. 1.50

Philadelphus grandiflora.
Flowers large in late spring; tall growth.
2 to 3 ft. .................................. 1.00
3 to 4 ft. .................................. 1.50

Philadelphus lemoinei ......... AVALANCHE
White flowers in terminal clusters. Upright; small
sharp pointed leaves.
2 to 3 ft. .................................. 1.00

Photinia villosa.
Tall growing, could be pruned to tree-form; small
grayish green leaves. White flowers in clusters, fol-
lowed by red berries.
2 to 3 ft. .................................. 1.00
3 to 4 ft. .................................. 1.50

Punica granatum rubra ....... POMEGRANATE
Large shiny leaves; double orange-red flowers about
two inches across. Yellow to red fruit about the
size of an orange. Heavy grower.
18 to 24 ins. .................................. 1.50
2 to 3 ft. .................................. 2.00
Rhodotypos kerroldes ................WHITE KERRIA
Flowers pure white nearly 2 inches wide; followed by black berries, hence sometimes called Jetbead.

Syringa ........................................ The LILACS
French varieties are better bloomers than the or-
dinary, and we present the following list with a good
deal of pride, believing that you will be well pleased
with each sort. The following in sizes 2-3 and 3-4 ft.

BERRYER. Semi-double; bluish.
BUFFON. Single; mauve-pink.
CHAS. JOLY. Double; reddish purple.
CLAUDE BERNARD. Double; pinkish.
DESCARTES. Single; pinkish.
DIDEROT. Single; purple.
HUGO KOSTER. Single; lilac.
JAN VAN TOL. Single; white.
JEAN MACE. Double; pinkish.
KATHARINE HAVEMEYER. Double; pinkish.
LAMARTINE. Single; pinkish.
LOUVOIS. Single; violet.
LUDWIG SPAETH. Single; reddish purple.
LUDWIG THIBOUT. Single; heliotrope.
MARECHAL LANNES. Double; violet.
MONTAIGNE. Double; pinkish.
PASCAL. Single; light purple.
WALDECK-ROUSSEAU. Semi-double; pinkish.

2 to 3 ft. ........................................ 2.25
3 to 4 ft. ........................................ 3.00
Also can supply in 4-5 ft. ........................................ 3.50
Claude Bernard, Lamartine and Pascal.

Syringa villosa ................................LATE LILAC
Lavender pink in terminal clusters. Upright, vigor-
oun. Very late for a lilac.
18 to 24 ins. ........................................ 1.50
2 to 3 ft. ........................................ 2.00
3 to 4 ft. ........................................ 2.50

Syringa vulgaris ................................COMMON PURPLE LILAC
Fragrant lilac flowers in the spring. Tall, vigor-
oun growth.
2 to 3 ft. ........................................ 1.50
3 to 4 ft. ........................................ 2.00

Syringa vulgaris alba ................................COMMON WHITE LILAC
18 to 24 ins. ........................................ 1.50
2 to 3 ft. ........................................ 2.00

Viburnum carlesii.
Fragrant white to light pink trumpet-shaped flow-
ers in clusters. Attractive gray-green foliage. Me-
dium grower.
2 to 2½ ft. ........................................ B.&B. 4.50
2½ to 3 ft. ........................................ B.&B. 5.50

Viburnum lantana ................................ WAYFARING TREE
Rather large leaves for a viburnum; flowers white
in wide cymes in the spring; red berries, turning
black.
2 to 3 ft. ........................................ 1.50
3 to 4 ft. ........................................ 2.00
Viburnum opulus ....... Highbush Cranberry
White flowers in clusters in the spring; bright scarlet berries in large bunches, in the summer. Tall growth.
2 to 3 ft. ........................................... 1.50

Vitex agnuscastus .......... LILAC CHASTETREE
Spreading, vigorous growth, 8 to 10 feet. Slender spikes of lilac flowers mid-summer.
2 to 3 ft. ........................................... 1.00
3 to 4 ft. ........................................... 1.50
4 to 5 ft. ........................................... 2.00
5 to 6 ft. ........................................... 2.50

Vitex macrophylla ... HARDY LILAC CHASTETREE
Vigorous, free flowering; smaller growing than V. agnuscastus, better bloomer. Spikes of blue flowers in the summer.
2 to 3 ft. ........................................... 1.25
3 to 4 ft. ........................................... 2.00

Weigela rosea ................. PINK WEIGELA
Showy pink bell-shaped flowers late spring; last to bloom. Roundish large leaves. Medium growth.
2 to 3 ft. ........................................... 1.00
3 to 4 ft. ........................................... 1.50
4 to 5 ft. ........................................... 2.00

Weigela vanhouettel.
Deep pink flowers late spring. Tall growth.
3 to 4 ft. ........................................... 1.50
4 to 5 ft. ........................................... 2.00

Wisteria, multijuga ... LONGCLUSTER WISTARIA
Climber. Purple flowers in May in long clusters.
2 year .................................................. 1.50

Wisteria sinensis .......... CHINESE WISTARIA
Heavy growth, purple flowers in April.
2 year .................................................. 1.50

COVERING THE SEASON

The following twelve families of plants are listed in approximate order of blooming, from early spring till late summer. An investment of about $20 will give you one each, and there will be but few days when some of them will not be in flower.

Jasminum nudiflorum ............... WINTER JASMINE
Exochorda grandiflora .............. PEARLBUSH
Forsythia .......................... GOLDENBELL
Cercis ....................... REDBUD
Spiraea
Syringa .......................... LILAC
Weigela
Philadelphus
Deutzia
Buddleia ................................ BUTTERFLY BUSH
Hibiscus ................................ ALTHEA
Lagerstromia indica ............... Crape MYRTLE
ROSE BUSHES

In offering the following varieties of rose plants, we believe they are the best for this section; the list has been gotten together after much thought and effort. You will be pleased with them.

Everblooming. Strong field grown ............. 1.50

RED

Charles K. Douglas. Flaming scarlet, flushed velvety crimson; fragrant.

Étoile de Hollande. Large deep bright red; velvety, lasting fragrant flowers.

Red Radiance. Bud large, flowers very large, double, fragrant; vigorous and hardy.

WHITE

Caledonia. Flowers large, double, slightly fragrant, white. Vigorous.

Kaiserin Auguste Viktoria. Creamy white in bud, flowers snow-white with slight tint at center, medium size, double, lasting, slightly fragrant.

PINK

Editor McFarland. Clear, brilliant pink; bud pointed; fragrant, long lasting.

Mrs. Chas. Bell. Shell-pink radiance, with shadings of salmon.

Radiance. Cameo pink. Bud large, flowers very large, globular, cupped, and double; extremely lasting, fragrant.

TWO-TONED

YELLOW

Lady Hillingdon. Bud medium size, globular, lasting, slightly fragrant, orange-vermillion; upright, bushy.

Mrs. P. S. DuPont. Bud medium, pointed, reddish gold; flowers medium size, semi-double, lasting, moderately fragrant, deep lemon yellow.

CLIMBERS AND RAMBLERS

Climbing E. G. Hill. Flowers large, dazzling scarlet, shading to a deeper pure red. Free bloomer, vigorous.

Climbing Caledonia,

Climbing Radiance,

Climbing Talisman, all are very similar to the bush type described above so far as their blooms are concerned, the main difference being that these climb.

Pauls Scarlet. Flowers medium size, semi-double, lasting; vivid scarlet shade. Strong, hardy. Usually blooms only once, with a very heavy crop in the early spring.
FRUITS
Listed in approximate ripening order.

Yellow Transparent. Medium size, skin pale yellow; flesh white, tender, juicy, sub-acid. June.

Early Harvest. Medium size; skin pale waxen yellow; flesh white, fine, crisp, tender, juicy sub-acid, mild. June.

Red June. Medium size; skin dark red; flesh white, fine, tender, juicy, brisk sub-acid. June.

Red Astrachan. Medium size, irregular shape; skin pale yellow, usually over-spread with red; flesh white, often tinged with red. Quality good. June.

Horse. Large; skin yellow, with occasional blush next the sun. August. An old-time favorite. June.

Summer Banana. Size medium; yellow, covered with stripes and splashes of light red and pink. Has a banana flavor.

Bonum. Medium size; skin yellow, mostly covered with red, striped, dots distinct. Flesh white, often stained next to the skin, firm, fine, tender, juicy, aromatic, mild sub-acid. Quality excellent. June.

Grimes Golden. Medium size; both skin and flesh a rich yellow; fine flavor. Fall.

Delicious. Large size; Red and yellow skin; flesh fine grained, juicy. Late fall and early winter.

Yellow Delicious. Large size; yellow skin and flesh; late fall.

Stayman. Medium to large; skin yellow and red with dots; flesh yellow, firm, tender, crisp, juicy, aromatic, sprightly, pleasantly sub-acid. August.

Winesap. Medium size; skin red on yellow; flesh yellow, firm, crisp, juicy, sprightly subacid, universally good. Winter.

GRAPE VINES

BUNCH SORTS, 2-year .................. .75

Moore Early. Medium size; black. Very similar to Concord except earlier.

Fredonia. Very fine quality, black, and should be planted in every collection.

Portland. Another new sort with us, white, and of the best quality.

Lutie. Small bunches, medium to large berries; skin brownish red; flesh pale green, juicy.

Delaware. Berries light red, small; fine flavor, juicy, tender, aromatic, refreshing, sweet.

Niagara. Bunches medium, berries large; skin light green; juicy, tender; mid-season; keeps well.

Concord. Large bunches and berries; light glossy black; flesh solid, juicy, fine grained.

Catawba. Coppery red; large bunches, medium size berries; juicy, sprightly, sweet and rich.

SCUPPERNONG or MUSCADINE FAMILY.

2-year ................................. 1.50

Scuppernong. Bronze colored skin; large size; flesh juicy, musky, sweet, sprightly, of excellent quality. Small clusters.

James. Largest berries of the family; black; flesh meaty, quality medium. Latest to ripen.

Flowers. An early ripening black sort of finest quality.

Male Muscadine. To pollinate only, but should be planted wherever the Scuppernong and James sorts are used, as a much better crop will be attained.
STRAWBERRIES

Dorsett. Vigorous grower; berries of large size, fine quality; excellent for home use. Early.

Fairfax. Very fine quality; berries large, firm, good keeper. Good grower, and moderately productive. Mid-season.

Premier or Howard 17. Early, large, bright red; prolific, a sure cropper. Spring fruiting sorts:

- 50 for $3.00
- 100 for $4.00

Mastodon Everbearing. A consistent producer of good berries, particularly if given extra care, fertilization and cultivation.

- 50 for $4.00
- 100 for $6.00

THE BRAMBLES

After the plant has fruited in the spring, the old canes should be removed, cutting off at the ground, and burning. The canes that fruit another season will then come up and be ready to bear the following spring. When first planted, cut back to within 4 or 5 inches of the ground.

Quantities quoted are the smallest lots we can supply—not less than 10 of a variety.

Prices on all as follows:

Per 10, $3.00; 25, $6.00.

Blackberry Plants

These require but little attention, producing good crops of fine berries. They are native to the Piedmont section, and will give excellent results with but little care except keeping the weeds and grass out, in addition to removing the old canes. No staking required.

Alfred. One of the best sorts; the berries are large and nearly coreless. Productive.

Eldorado. A strong, upright grower; large juicy berries.

Boysenberry Plants

The berries are very large, delicious flavor. The plant is a very vigorous grower, and for this reason should be planted on medium to rather poor soil, well drained; tie up to a wire fence of about three strands, handling carefully. Thornless type.

Dewberry Plants

Lucretia. Berries usually larger than Blackberries, some weeks earlier; soft, sweet, luscious!

Raspberry Plants

More difficult to grow in Piedmont section, and of but little value in eastern section unless given special attention. The plants do much better if kept mulched. The soil must be good, and the deeper the better.

Cumberland is the standard black sort, and is a favorite where black raspberries are desired.

Latham is recommended as being one of the good ones; a thrifty grower, bright red berries.

Note. Not less than 10 of a kind sold in any one order.
The Best in SMALL FRUIT

Grape Vines will give you a lot of fruit for a little care. Plant a number of vines now.

Lindley NURSERIES, INC.
Complete Landscape and Planting Service
GREENSBORO, N.C.
Just a few trees of each sort of fruit will do much to make your home grounds more attractive and profitable.
